single elements, the interrelating of these elements, and the relating of them to the total form.

Architecture - Space and mass | Britannica

sign spaces, where a design space is a parametrized set of possible model architectures. Design space design is akin to manual net-work design, but elevated to the population level. In each step of our process the input is an initial design space and the output is a refined design space of simpler or better models. Following [21],

Designing Network Design Spaces - arXiv

A design-build methodology was employed and streamlined to meet a fast moving schedule, with the dynamic design process that evolved during construction. The methodological constraints of the project led to explorations of an 'elevational' architecture, focusing on systemic

The relationship diagram takes your design from data to a more visual look at physically planning out your space. It is abstract, and rough but enables you to develop your understanding of the requirements and visualise how the spaces will work together and how the circulation may flow between them.
