The ViPR is a very versatile piece of gym kit designed for weighted movement training. It's formed of a hollow, rubber, cylindrical weight with two handles built into its sides, and ranges from 4kg to 20kg. The varied weight of the ViPR means that it is a useful resistance training tool for anyone from beginner level upwards, and the diversity of movements possible can provide a challenge for any and all of your muscle groups.

5 exercises you can do with ViPR | Nuffield Health

Begin by standing the ViPR vertically on the floor in front of you and grab it by the top, standing with your feet together. Then, take a step to the side with one foot, go into a lunge and touch the ViPR to the ground and return to the standing position, bringing the ViPR with you.

ViPR® Pro - SPRI

The ViPR is an all-purpose fitness tool originally designed to improve the strength and fitness of children for sports. The aim was to train children in three dimensional movements while carrying load – something young athletes were only good at if they'd come from farm work – and improve their long term ability in field sports.
